

Oliver Sanderson

Front-end Software Developer

Versatile and results-driven software developer with a keen focus on front-end development, particularly in React.js, alongside proficiency in Angular and Python. Holding a Bachelor's degree with Honors in Computer Science and further honed skills through an immersive full-stack development program, I bring a solid foundation to my freelance endeavors, helping clients achieve their goals through robust software solutions. With a strong foundation in both technical expertise and interpersonal skills, I excel in effectively conveying complex ideas to clients with varying levels of technical proficiency.

Experience

Freelance - React Developer - (2024)

- React, JavaScript, HTML /CSS, Web Development
- React.js freelance work creating dynamic and engaging websites for clients. Dedicated to delivering high-quality, scalable solutions that meet and exceed client expectations. Collaborating effectively with clients to understand requirements and deliver tailored solutions.

Next Flow - Software Developer - (2022 - 2023)

- Angular, TypeScript, React, JavaScript, HTML/CSS, Web Development
- Part of a dynamic team consisting of four developers outsourced by various companies to construct projects or reinforce existing teams. This unique working model demanded adaptability as I seamlessly integrated into diverse projects and teams, ensuring swift assimilation and effective collaboration. Development of applications interfacing with APIs to connect to Python backend systems.

Veiovia Ltd - Junior Software Developer - (2022)

- Python, React, JavaScript, HTML/CSS
- Developed a React website for a Web3 project, prioritizing scalability and ensuring seamless cross-device usability.
- Used Python to conduct in-depth analysis of datasets pertaining to DNA sequencing, crucial for scientific research and data-driven decision-making processes.

Ministry of Defense - Data Analyst - (2019 - 2021)

- Analyse SQL

Ebuyer - Product Supervisor - (2013 - 2019)

- JavaScript, HTML/CSS
